100% Natural. Uniquely New Zealand.

# Timeless Beauty

**Beauty secrets 80 million years in the making.**

Isolated from other land for more than 80 million years, New Zealand has developed a natural landscape you won't find anywhere else on earth.

More than 80% of New Zealand's native plants are indigenous and many come with remarkable bioactive properties. Sourced from forests, lands and seas, Living Nature's active ingredients come from the most potent of these unique plants, such as Manuka, Kumerahou, Harakeke and Kelp.

They're chosen for powerful healing, purifying and nourishing skin benefits to create some of the safest, purest and most effective certified natural skincare in the world.

Our products reflect the country from which they were developed – pure and potent, Living Nature is made of New Zealand.
