Harakeke

PHORMIUM TENAX LEAF JUICE NEW ZEALAND FLAX GEL

Water is the stuff of life. Every living thing needs it to survive, and so does your skin.

Harakeke Flax Gel is nature's super skin hydrator, with a high quantity of natural skin nutrients and polysaccharides.

The mild astringency of Harakeke helps control oil overproduction, which coupled with a natural antimicrobial action, makes it an effective defence against breakouts. It naturally soothes, hydrates and cools, reducing puffiness and redness.

Independent in vitro tests* show Harakeke to be more hydrating, moisturising and healing than aloe vera, which is why we use it extensively in our range. It's perfect for our Firming Flax Serum, Hydrating Toning Gels and Nature's Hydrating Mist.

Help your skin maintain its moisture, just as nature intended.
