Manuka Honey

MEL

From the nectar of the native New Zealand Manuka flowers, Active Manuka Honey is a miracle beauty ingredient.

A natural antimicrobial, it's one of nature's miracle healers, even approved for use in EU and USA hospitals for wound healing. These same properties make it perfect to enhance your skin's renewal process.

The nutrients, vitamins, amino acids and minerals in Active Manuka Honey give it special qualities. It not only works as a humectant, drawing moisture into the skin, but also contains a unique active component derived from the Manuka tree, making it one of the most biologically active and beneficial honeys for the skin.

This uniquely New Zealand healer has extraordinary skin benefits – hydrating, moisturising, nourishing, healing, rejuvenating and protecting. That's why it's is a key ingredient throughout Living Nature's range, including in our Nourishing Night Cream, Nourishing Day Cream, Rescue Gel and Balancing Night Gel. It's used to firm and soothe, help repair cell damage and protect against blemish-causing bacteria.

And since it's safe to eat, you know you can put it on your skin.
